

CMPT 295

Final Examination Information

Final Examination

- When: Friday, August 15 from 8:30am to 11:30am
- Where:
 - if your **lastname** starts with the letter **A to L** => in **B9200**
 - if your **lastname** starts with the letter **M to Z** => in **B9201**
- Duration: 3 hours

Final Exam Seating Arrangement

Put all your belongings at the front of the room!

This included cell phones, laptops, tablets, calculators and pencil cases/pouches.

Keep pens, pencils, eraser and student card with you!

What to study?

Everything we covered in our **lectures** this semester is subject to examination (except when labelled “optional”)

- All material from Lecture 1 until and including Lecture 39
- All labs
- All assignments + last exercise set
- All demo code and homework posted on our course web site
- All midterms
- **Emphasis is on the material seen from Lecture 27 to Lecture 39**

What to study?

- Textbook Readings + Practice Problems:
 - Chapters 2 and 3 + Practice Problems (see Information about Midterm 1 and Midterm 2 for listing)
 - Chapter 5, Sections 5.1 to 5.9
 - Practice Problems 5.1 to 5.3, 5.7 to 5.9
 - Chapter 6, Sections 6.2 to 6.7 (6.1 optional, skip 6.4.5)
 - Practice Problems 6.7, 6.8, 6.9, 6.12 to 6.20
 - In some of these practice problems, the cache is defined as “write-through” and “write-allocate”. Ignore these. Simply know that these two cache characteristics imply that the data must first be copied into the cache in order to be written (same as when it is read). Therefore, whether the microprocessor is reading or writing data from/to the memory hierarchy, we can simply see these two operations as “memory accesses” and not differentiate between them.

Format of Final Exam

- First section: Multiple choice questions
- Second section: Questions that require written answers
 - For example:
 - Calculating – **Always show every step of your work**
 - Writing/completing C or assembly code
 - Drawing
 - Hand tracing code
 - Writing an answer (in English)
 - etc...

When writing your final exam...

I strongly suggest you ...

- Read each question carefully before answering it, then answer it, then read the question again to make sure you actually did completely answer it!
- Keep in mind that the marks for each question are given in []. Use this to manage your time.

Before our final exam starts ...

1. Once you have received your final exam, leave it on your table
2. Please, do not leaf through or write your name on the final exam yet
 - **Why?** Because it is *unfair* to all other students who have not yet received a final exam
3. Take this opportunity to read the **instructions on Page 1** of the final exam
4. When all students have received a final exam, you will be instructed to **start the final exam**

As you start the final exam

1. Go over your final exam quickly looking for **printing errors** which look like this:

```
0 000 0 000 00 r000r0 0000 00 000 00000000 00 00r target machine 0 000
myParameter 00000 000 00000-327680
a. 32767 d. 32768
b. -32768 e. None of the above
c. -32767
```

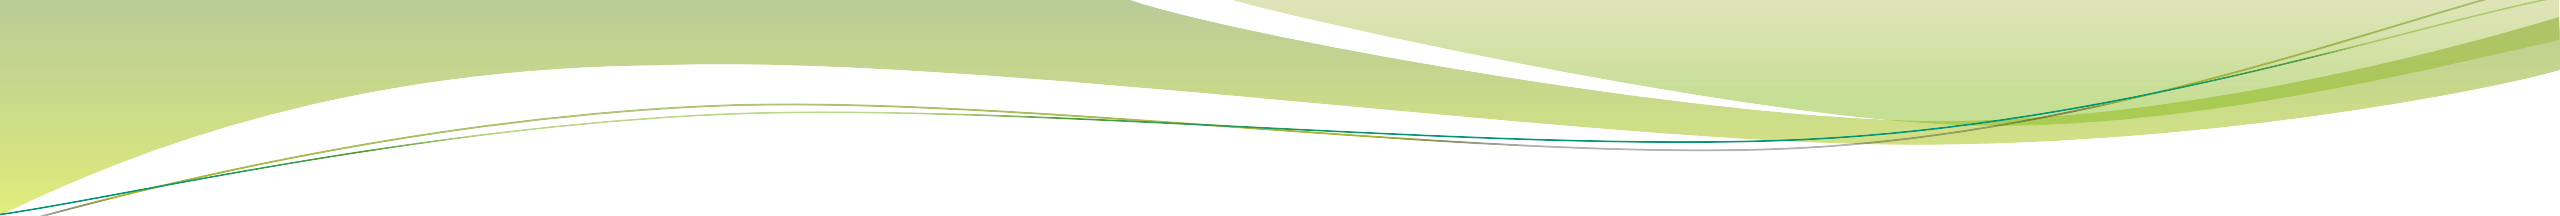

- Look for any “weird” characters that cannot be read and understood!
- If you find these **printing errors** in your final exam, alert the instructor/TA right away - you will then be given another final exam

During the final exam

1. You can unstaple your final exam
2. Please, do not write over the QR code at top right of each page of the final exam
3. You can ask questions during the final exam
 - The instructor is the only person answering questions during the final exam – the TAs will simply be directing questions to the instructor
 - Note that the instructor will not be able to answer questions such as *Is this the correct answer?*
4. Don't forget to use the bubble sheet on the last page of final exam

When the time is up ...

1. You will be instructed to **stop writing!**
2. Please, **do** stop writing and hand in your **complete** final exam as instructed
 - **Why?** Because, if you continue writing, it is unfair to all other students who have stopped writing
 - If you continue writing, this will be considered an act of *Academic Dishonesty* -> 0 marks

Good luck in our studying!
